Term conversions will no longer be treated as a continuation of coverage April 1

Submitted by Anar on March 2, 2016 - 12:05pm

Highlights

Converting term insurance to new permanent insurance is a benefit under many life insurance policies. Beginning April 1, 2016, we will no longer treat converted coverage as a tax continuation. This will help us provide better service to clients. This is an administrative change to our practice of treating certain converted coverage as a continuation of the original coverage from a tax perspective.
